Runtime settings Info

Runtime
Choose the language to use to write your function. Note that the console code editor supports only Node.js, Python, and Ruby.

| Java 21 ▼ | ⟳

Handler Info

| org.example.MyLambdaHandler::handleRequest |

Architecture Info
Choose the instruction set architecture you want for your function code.

◉ x86_64
○ arm64

ⓘ You can change either the function's runtime or the instruction set architecture in one update. To update both, you must repeat the update process.

Test event Info

CloudWatch Logs Live Tail   Save   **Test**

To invoke your function without saving an event, configure the JSON event, then choose Test.

Test event action

🔘 Create new event   ⚪ Edit saved event

Event name

lamdba_event

Maximum of 25 characters consisting of letters, numbers, dots, hyphens and underscores.

Event sharing settings

🔵 Private

This event is only available in the Lambda console and to the event creator. You can configure a total of 10. Learn more 🔗
